About the Speaker

Dr Bhavna Shroff DDS, MDentSc, MPA

Dr. Bhavna Shroff obtained her DDS at University Paris V, her certificate in Orthodontics and Masters in Dental Sciences at University of Connecticut. She is a Professor and the Graduate Program Director in Orthodontics at VCU. She was awarded a Masters in Public Administration at VCU in 2008. Dr. Shroff has lectured nationally and internationally. She is currently the Graduate Program Director in Orthodontics at VCU School of Dentistry in Richmond, VA. She is a past member and chair of the COSA and the past president of the North Atlantic Component of the Angle Society. Dr. Shroff is the National Secretary of the EHASO. Dr. Shroff's research interests include the mechanisms of tooth eruption and the biology of tooth movement and she has attracted intramural and extramural funding from NIDR, the AAOF, and the AD Williams foundation. Dr. Shroff has published extensively in the areas of tooth development and eruption, biomechanics and appliances design, and clinical orthodontics. Dr. Shroff is certified by the American Board of Orthodontics. She is a fellow of the American College of Dentists and the International College of Dentists.

Synopsis

Topic 1:

Root Resorption and its implication in Orthodontics: Evidence based treatment decisions to avoid litigation.

This presentation is a critical review of the scientific evidence currently available about the relationship between orthodontics and the occurrence of root resorption. The lecture will discuss the potential challenges of treating patients with root resorption and the standard of care when treating populations at high risk of root resorption. Root resorption will be discussed from a legal standpoint and recommendations to optimize treatment outcomes will be discussed.

Topic 2:

Impacted Canines: How can we optimize the outcomes?

This lecture will explore the 3D diagnosis using CBCT and the biomechanics of erupting impacted canines. The presentation will also provide detailed strategies to control and minimize side effects. A discussion on the type of surgical canine exposure will be presented to demonstrate how to maximize the periodontal health and the esthetic outcomes of treatment.
