**Salvin Non-Glare Featherweight Microsurgery Instruments**

*Custom Designed For Periodontal Microsurgery*

**NEW!**

- ▶ Light & Long
- ▶ Smooth Tips
- ▶ Rounded Handles
- ▶ Non-Locking
- ▶ Black Non-Glare Coating

"The Salvin microsurgical instruments exhibit a semicircular grip to enhance handling and haptic feedback; these instruments are light in weight to prevent muscle fatigue and have been designed without locking mechanisms to prevent undesirable traumatic instrument manipulation. The dark surface coating minimizes glaring when working under coaxial illumination. Once you use these finely crafted instruments it will be hard to work with any other set!"

**Dr. Diego Velasquez**  
Periodontist, Fenton, MI

"The Salvin microsurgery set combines the features needed in high quality surgical instrumentation. The non-reflective black coating effectively eliminates glare during surgeries, allowing for better visibility and precision. The lightweight design enhances our tactile control, and the smooth tips are conducive for manipulation of micro sutures. Salvin listened to what we needed and delivered!"

**Dr. Irene Marron-Tarrazzi**  
Periodontist, Miami, FL

"When performing perio plastic surgery under magnification and illumination, using specialized instrumentation is critical to my success. The Salvin microsurgery instruments check all of the requirements I need: Light, long, non-reflective, rounded handles and manufactured with the highest quality. This is exactly what I use in my practice."

"Impla-Safe is the first fully implant-specific instrument set for peri-implant maintenance, and for the prevention and non-surgical management of peri-implant inflammation. From the flexible probe to the soft titanium alloy instruments for implant-specific factors, such as excess cement, this set addresses the iatrogenic damage caused to implants by dental instruments and scaling using an evidence-based workflow. Should be integral in the maintenance of patients with dental implants."

**Dr. George Kotsakis**  
Periodontist, Hoboken, NJ

"These exceptionally well crafted implant site specific instruments for detecting and removing excess cement are a brilliant innovation and must have for all implant surgically based clinicians."

**Dr. Michael A. Pikos**  
Oral Surgeon, Palm Harbor, FL

"The Impla-Safe set is a game-changing, revolutionary implant-specific solution!"

**Dr. Jennifer Hirsch Doobrow**  
Periodontist, Cullman, AL

"I'm excited to see an implant specific solution with instruments that adapt to the shape of implant-supported restorations and can help detect excess cement during and after cementation."

**Dr. Konstantinos Choclidakis**  
Prosthodontist, Rochester, NY

"The Impla-Safe Protocol and instrument set addresses what has been missing in peri-implantitis treatment: an evidence-based, implant-specific solution for our patients."
