

FOREVER GREEN DENTAL PRODUCTS LIMITED

Unit 1202, Lippo Sun Plaza, 28 Canton Road, Tsim Sha Tsui, Kln
Tel: 2388 2798
Fax: (852) 2332 8183
E-mail: forevergreendental@gmail.com

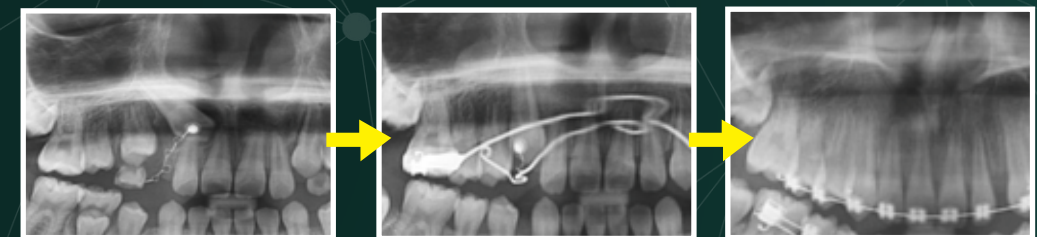

Dr. Un-bong Baik DDS. MS. PhD.

A) Molar protraction and uprighting

B) Management of impacted canine

Enrolment Form

Name : _____

中文姓名 : _____

Address : _____

Phone No. : _____ Fax No. : _____

Mobile No. : _____

Email : _____

Cheque No. : _____ Bank : _____

I would like to enroll in the lecture

HKD 2500 (Before 6 Jan 2019) HKD 3000 (on or after 7 Jan 2019)

Course fee includes: coffee breaks, lunch

Should you have any enquiries, please feel free to contact - *Ms. Phyllis Wong 2388 2798*

email : forevergreendental@gmail.com

Please complete the enrolment form together with a crossed cheque payable to

Forever Green Dental Products Ltd.

fax to : *2332 8183* or

post to : *Unit 1202, Lippo Sun Plaza, 28 Canton Road, Tsim Sha Tsui, Kowloon, Hong Kong*

Disclaimer : The organizer reserves the right to cancel, postpone or change the venue, date and time of the event due to unforeseen circumstances. In the event of cancellation, only course fees will be refunded.

Date : 13 Jan 2019 (Sunday)

Time : 9:00 a.m - 5:30 p.m

Venue: Forever Green Dental Products Limited

Unit 1202, Lippo Sun Plaza, 28 Canton Road, Tsim Sha Tsui, Kln

Language : English

CME Points : NONE

About the Speaker

Un-bong Baik DDS. MS. PhD.

1990 Graduated from Dental College, Seoul National Univ., Seoul, Korea
1990-1993 Resident course at Oral and Maxillofacial Surgery, Inje Univ. Seoul, Korea
1997-2002 Resident course and Ph.D. at the Orthodontics, Tohoku University, Senai, Japan

Now:

Regular member of Angle Society (North Atlantic Component)
Visiting Clinical Professor, Orthodontics of Ewha, Catholic, Aju, Inje and Hanlim Univ., Seoul, Korea
International member of AAO (American Association of Orthodontists)
Member of WFO (World Federation of Orthodontists)
Member of KAO (Korean Association of Orthodontists)
Secretary General of KAOOS (Korean Academy of Orthodontics and Orthognathic Surgery)
Director of Publicity of KSSFO (Korean Society of Surgery first Orthodontics)
Executive Director of K-IDT (Korean Interdisciplinary Therapy)
Reviewer of AJODO (American Journal of Orthodontics and Dentofacial Orthopedics)
Reviewer of AO (Angle Orthodontists)
Reviewer of JKAOMS (Journal of Korean Association of Oral and Maxillofacial Surgeons)

Synopsis

Up to now, there has been a lot of attention given to molar distalization, while molar protraction has been left out of the discussion for the most part. This lecture deals with 2nd molar protraction of L-6 (Lower 1st molar missing), L-E (E missing with 2nd molar missing), and U-6 (Upper 1st molar missing). After 2nd molar protraction, even a horizontally-impacted 3rd molar can be uprighted. The existing researches about the 3rd molar have been about its movement after 2nd molar extraction. This lecture is totally different from those because it deals with research after 2nd molar protraction rather than extraction. This 8-hour lecture concentrates on only "Molar protraction." Molar protraction can be used very widely, not only with orthodontic patients, but also with general dental patients with a damaged molar. It can be a successful new area in the field of orthodontics. Among the 260 cases, 2 cases were selected as "Case of Month of AJODO" (June 2012 and March 2017). Also, in July 2017 in JCO, the case of simultaneous missing space closure of the 2nd premolar and the 1st molar was published. He has also studied the spontaneous movement of an impacted 3rd molar after 2nd molar protraction. The first original article was published in Angle Orthodontists in July 2016. Also, the 2nd original article is now in the middle of revision at AJODO. He also wrote an English book that is being sold on Amazon. This book was introduced in the Book review corner of JCO, Feb. 2014. Dr. Neal Kravitz praised Dr. Baik as the "Master of Molar Protraction." Dr. Baik has treated 260 cases of L-6, L-E and U-6 totally by himself, while the other author only contributed article writing.

Session-I : Molar protraction

- (1) Case review, Formation of molar occlusion
- (2) Mechanics
 - i> AJODO case of the month (2012) review
 - ii> Pure molar protraction of long missing space without tilting
 - iii> Vertical control (Open bite control)
 - iv> Transverse control (crossbite control)

Session -II : 3rd Molar

- (1) AJODO case of the month (2017) review
- (2) Vertical eruption pattern of impacted 3rd molar after molar protraction
- (3) Horizontal movement (tilting & uprighting)
- (4) Uprighting mechanics of horizontally-impacted 3rd molar

Session-III : Clinical application:

- (1) Retention
- (2) Failed case (4 cases) analysis
- (3) Differential diagnosis of easy and difficult cases
- (4) Ridge problem
- (5) Acknowledgement

Session-IV : Management of impacted canine
